

# Instructions for photographers during services at St Peter's Field Broughton

A record of the wedding is a precious reminder of a very special day, but a wedding service in Church is one of the Christian *holy sacraments*, and those filming must respect this: the following conditions therefore apply to those filming or photographing during services. **During weddings that means until the signing of the registers.**

1. **No movement:** pick a position and stay there.

2. **No noise:** set cameras to run silently – make sure the 'click' is inaudible.

3. **No flash photography.**

4. **Do not go beyond the front pew:** beyond the red line is out of bounds; unmanned cameras may be positioned at the blue crosses. Tall camera tripods will be necessary.

3. **No other distraction please.**

Services may be halted if these conditions are not kept.

A further statutory live performance fee may be payable if the organ playing is recorded.
